PROJECTS

- Harmonia**
<https://alexvinola.com/#projects>
Multi-tenant helpdesk and incident platform (Java, Spring Boot, Angular, PostgreSQL). Integrating Kadmos, an AI agent for incident investigation.
- Stemma CLI**
github.com/alexvinola/stemma-cli
Deterministic compiler that turns one repository context into each coding agent's native format (CLAUDE.md, AGENTS.md, Copilot, Kiro).
- AI Workflows**
github.com/alexvinola/AI_Workflows
LLM agent orchestration, model evaluation and task automation. Python · Hugging Face.

EDUCATION

- Advanced Degree Multiplatform Software Development (CFGS)**
CPIFP Los Enlaces (Zaragoza)
2021-2023
For my final degree project, I worked with .NET Maui, .NET, SQL, as well as Azure and SignalR, which earned me an honorable mention.

LANGUAGES

- English: **Advanced (CEFR B2)**
- Spanish **Native**

PROFILE

Senior Software Engineer with 3+ years of experience in Java, .NET and Angular, specialised in software architecture: microservices, hexagonal and Clean Architecture, and SOLID principles. I combine this with hands-on GenAI experience: designing AI agents with tool calling and MCP, and evaluating them with evals, LLM judges and MLflow. Deeply interested in the intersection of solid software engineering and practical AI, including Spec-Driven Development as a method to integrate agents into real development workflows. Always learning: Go, cloud infrastructure and multiple architectures.

WORK EXPERIENCE

Senior Software Engineer | GenAI
hiberus TECNOLOGÍA Hiberus (Zaragoza, Spain) July 2026 - Present

- Design and build AI agents using tool calling, MCP and agentic architectures (Python, Java).
- Define baselines, evals and performance metrics for agents; tracing and experimentation with MLflow.
- Contribute to the architecture and technical design of Java (Spring Boot) and Angular applications from inception, using hexagonal architecture.
- Drive internal AI-assisted development initiatives: evaluating tools and integrating agents into development, testing, code analysis and documentation.

- Java Spring Boot Angular Python GenAI LLM Agents MCP
- MLflow Agent Orchestration Kubernetes

Full Stack Developer | Sportium
hiberus TECNOLOGÍA Hiberus (Zaragoza, Spain) January 2025 - July 2026

- Built and evolved Sportium's real-time data platform, streaming live data to its betting websites.
- Distributed .NET architecture with SignalR, WebSockets, RabbitMQ, Cloudflare and multi-level caching for low latency and high availability.
- New microservices, Angular frontend, CI/CD and third-level production support.

- .NET Angular Microservices TypeScript Docker Kubernetes SignalR
- RabbitMQ Architecture Scrum / Agile CI/CD

Full Stack / Mobile Developer

 **Integra** Integra Tecnología (Zaragoza, Spain) March 2023 - December 2024

- Built mobile apps with .NET MAUI and web apps with .NET MVC and Angular on .NET 7 backends, published to the App Store and Play Store.
- Implemented Azure Functions services, REST API integrations with external systems and real-time communication with SignalR.
- Took part in code reviews and quality practices.
- Joined as an intern (Mar–Jun 2023), building an enterprise activity-management web app with Angular, PrimeNG and .NET: file import/export, SMTP email and token authentication.

- .NET .NET MAUI Angular SignalR REST API
