EDUCATION

Advanced Degree Multiplatform Software Development (CFGS)

CPIFP Los Enlaces (Zaragoza)

2021-2023

During my higher education, I acquired proficiency in various technologies and working methodologies. The primary technologies I learned encompassed .NET, Java, HTML, XML, and SQL, along with the utilization of various integrated development environments (IDEs).

For my final degree project, I worked with .NET Maui, .NET, SQL, as well as Azure and SignalR, which earned me an honorable mention.

LANGUAGES

English: **Advanced (CEFR B2)**

Spanish **Native**

PROFILE

I'm a Full Stack Developer with experience in C#, TypeScript, and SQL, specialized in .NET and Angular, I work with microservices architectures, applying Clean Architecture, layered separation, and SOLID principles, developing REST APIs, integrating with external systems, and processing real-time data.

I work in Agile (Scrum) environments managing tasks with Jira, and I use Git/GitLab for version control, merge requests, code reviews, and CI/CD.

I also have experience with quality practices such as code reviews, project standards, and testing when appropriate.

In addition, in my free time I explore and deepen my knowledge of new technologies to keep learning—especially areas like Golang, Python, React, and other modern stacks—with the goal of broadening my technical perspective and continuously improving as a developer.

WORK EXPERIENCE

AI Research

hiberus
TECNOLOGÍA

Hiberus (Zaragoza, Spain)

April 2026 - Present

Internal collaboration on AI research and development initiatives, contributing to the design and implementation of GenAI-based tools in Python, including agent orchestration, reusable skills, and workflow automation for internal productivity and process improvement.

Full Stack Developer

hiberus
TECNOLOGÍA

Hiberus (Zaragoza, Spain)

January 2025 - Present

I am part of the development team at SPORTIUM, where I contribute to the development of new microservices to enable new functionalities on the websites, aiming to improve the system's scalability and performance. Additionally, I work on frontend components using Angular, within a Full Stack approach based on .NET and Angular technologies.

Full Stack / Mobile Developer

integra

Integra Tecnología (Zaragoza, Spain)

July 2023 - December 2024

I specialized in developing mobile and web applications using .NET Maui for mobile apps and .NET MVC for web apps. My primary focus is on designing and implementing robust and efficient architectures for backend development with .NET 7. Additionally, I have experience in creating dynamic and appealing user interfaces using Angular.

I also have knowledge in implementing Azure Functions for service development and deploying applications to the App Store and Play Store.

Software Development Internship

integra

Integra Tecnología (Zaragoza, Spain)

March 2023 - June 2023

During my internship, I contributed to the development of an enterprise web application designed for activity management. I worked with key technologies, including Angular, Bootstrap, and PrimeNG for the frontend, and .NET on the backend. My focus was on implementing various functionalities such as file import and export, SMTP email sending, and token and refresh token management.
